

Frozen is the
New Fresh

About Us

Grofresh Agrofoods was founded in 2019, by a team of passionate and experienced people from the frozen food industry. Mr. Srinivasa Naik, Founder Director has been associated with the Fruit and Vegetable processing industry for many years. He has worked for some of the top companies in India and has ventured on his own to offer high quality processed fruits and vegetables to buyers / importers from different parts of the world.

Vision

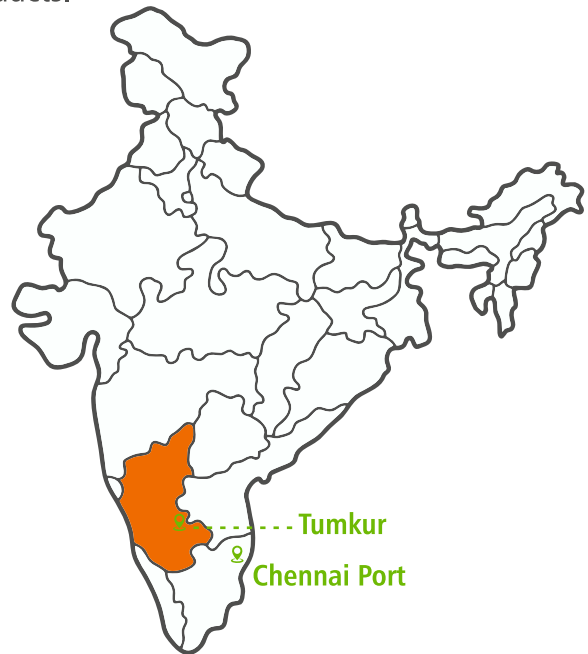

To be the best in the field and be the preferred choice for our customers when it comes to sourcing of frozen/dehydrated fruits and vegetables.

Mission

We hope to accomplish our vision by working closely with farmers for backward linkages and training our people to always aim high in following best processing practices in a safe and hygienic way so that our customers always get good quality products.

Location

The company has set up its modern facility at Tumkur (close to Bangalore), Karnataka, India, to process and export a wide range of fruits and vegetables.

Strategic Location Benefits

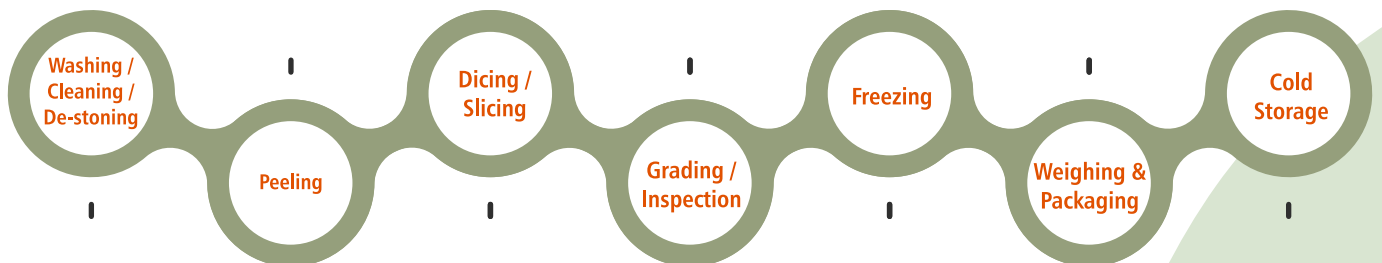

- Excellent backward linkages with proximity to regions rich in horticulture.
- Availability of wide range of raw materials like Mango, Guava, Papaya, Musk Melon, Coconut, Sweet Corn, Baby Corn, Beans, Carrot and more.
- Quick transport time of raw materials thus resulting in fresh arrivals and quick turnaround time for processing.
- Proximity to Chennai Port.
- Good connectivity to Ports of Mangalore and JNPT.
- Good availability of Power, Water and Labor.
- Proactive support of Government for Agro Processing Industries.

Infrastructure & Processing Technology

The company has invested in a very modern facility with adequate space for raw materials receiving, holding, processing and storage facilities. The company deploys modern **IQF (Individually Quick Freezing) Technology** for freezing a wide range of fruits and vegetables. The company also uses **Blast Freezing technology** to handle a wide range of frozen Purees and Pulp. The unit also has facilities to produce a wide range of Dehydrated fruits and vegetables.

Process Flow

The unit has separate vertical for sourcing of raw materials and also has an in-house lab to check on the quality of raw materials, semi-finished and finished products.
